# User Persona

**ACCADIN, an application integrated with event reminder, introduction and socialization specially for ACCAD guests.**

ACCADIN is a reminder for every activities in ACCAD, which can deliver news, events and any other activities without delay. ACCADIN is integrated with iOS Reminder app and Clock so users will not miss any important tagged events. It also provides private events and public events based on the invitation that users received.

Additionally, ACCADIN is a learning bridge between users and Sullivan Hall. This app is based on Beacon technology (GIS) which could provide appropriate information to users in a certain location. Through this technology, a Future and Past Sliding feature is built into the app that enables users to see current and historical environment in a selected location.

Another key feature is the socialization function. With a registered account, users can send message, share performance information, video chat and schedule meeting with other users.

# John

**User age:** 20

**User gender:** male

**Income level:** N/A

**Education level:** undergraduate art major

**Ethnic information:** Europe

**Hobby:** comics, drawing, exploring new things

## Introduction

John, an art college student who likes comics and drawing during his daily life. He also like traveling to see splendid architectures around the world. He is typically passionate about trying new things like technology and products.

Like other students, John has classes from 8-12 and 2-5. During the lunch time, sometimes, he will grab a sandwich and eat around the campus; sometimes, he just stays at his department building working on his project.

John has never been to Sullivant Hall before because he is a freshman and there is no class in that hall in his first year. Unless his friend told him there is a comics library, he would never heard about the Sullivant Hall. He wants go check there for his own hobby and is excited to explore the whole Sullivant Hall building.

# Elise

**User age:** 47

**User gender:** female

**Income level:** 65K/year

**Education level:** college anthropology professor

**Ethnic information:** Australia

**Hobby:** teaching, ballet performance, writing.

## Introduction

Professor Elise keeps very clear routines during her life. Elise likes to teach from morning until noon because she has a lot of meetings and public lectures during the afternoon. After finishing her day work, Elise will go to see her daughter practicing music instrument in school of music or go home prepare dinner.

Like her daughter, Elise likes art, not only music but also dance and drawing. Since she likes watching dancing and other performances, one of her friend, an instructor in Sullivant Hall sometimes invites her to see students practicing dancing. She has been to Sullivant Hall several times before but hasn't quite familiar with the building.

Elise will be invited to visit Sullivant Hall more frequently, because there will be a dancing competition in the next month and her friend knows Elise is interested about it.

# Brittney

**User age:** 19

**User gender:** female

**Income level:** N/A

**Education level:** future student, seeking major of dancing

**Ethnic information:** American

**Hobby:** dancing, fitness, music

## Introduction

Brittney, the winner of 2012 dance competition in teenage group. Starting dancing since elementary school, Brittney has mastered youth professional dancing skills. She wants to make dancing as her major in the future undergraduate study.

Brittney has been to Sullivant Hall once with her family during the summer campus tour after she got the offer from OSU. And after the visit to Sullivant Hall, She fell in loved with the nice and clean environment of the building.

She knows that Sullivant Hall will be a place where she stays most of time during her incoming college life.

**ACCADER, an application tailored for ACCAD students with usable and convenient features.**

ACCADER is definitely a must have app for every student in ACCAD. It can sync class schedule and import it into to database to enable classroom service and map service for students. With classroom service, students can check class schedule, room availability and event reminder.

ACCADER is also a self-learning and monitor tool. With the app, students can remote cameras inside the classrooms to record their performance or practice and check the recording later, or even upload it into ACCAD server and get feedback from instructor.

Another key feature is the classroom in cloud. With permission, instructors can view students performance via cloud and interact with them by giving feedback and sharing to others.

**Classroom service**  
**Practice monitor**  
**Classroom in cloud**

# App Introduction

## Objective

Assisting users to explore Sullivan Hall and helping them know the history of the building better.

## User group

- **Student** People who are new to the
- **Staff** Sullivant Hall and want to
- **Visitor** get to know this building.

## Features

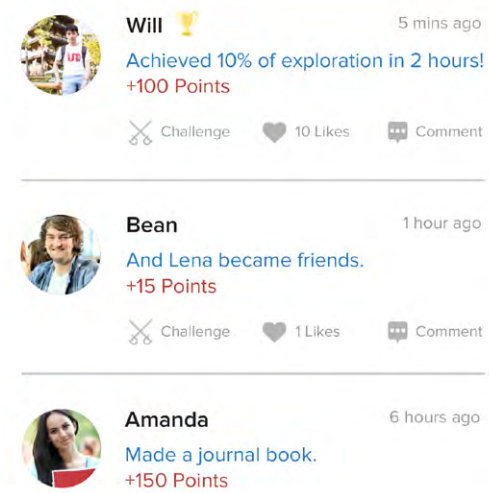

Real time guide with Beacon tech

Past & Now look

Exploration history, photos making into journals

Friends' (explorers) moment

# Usability Test

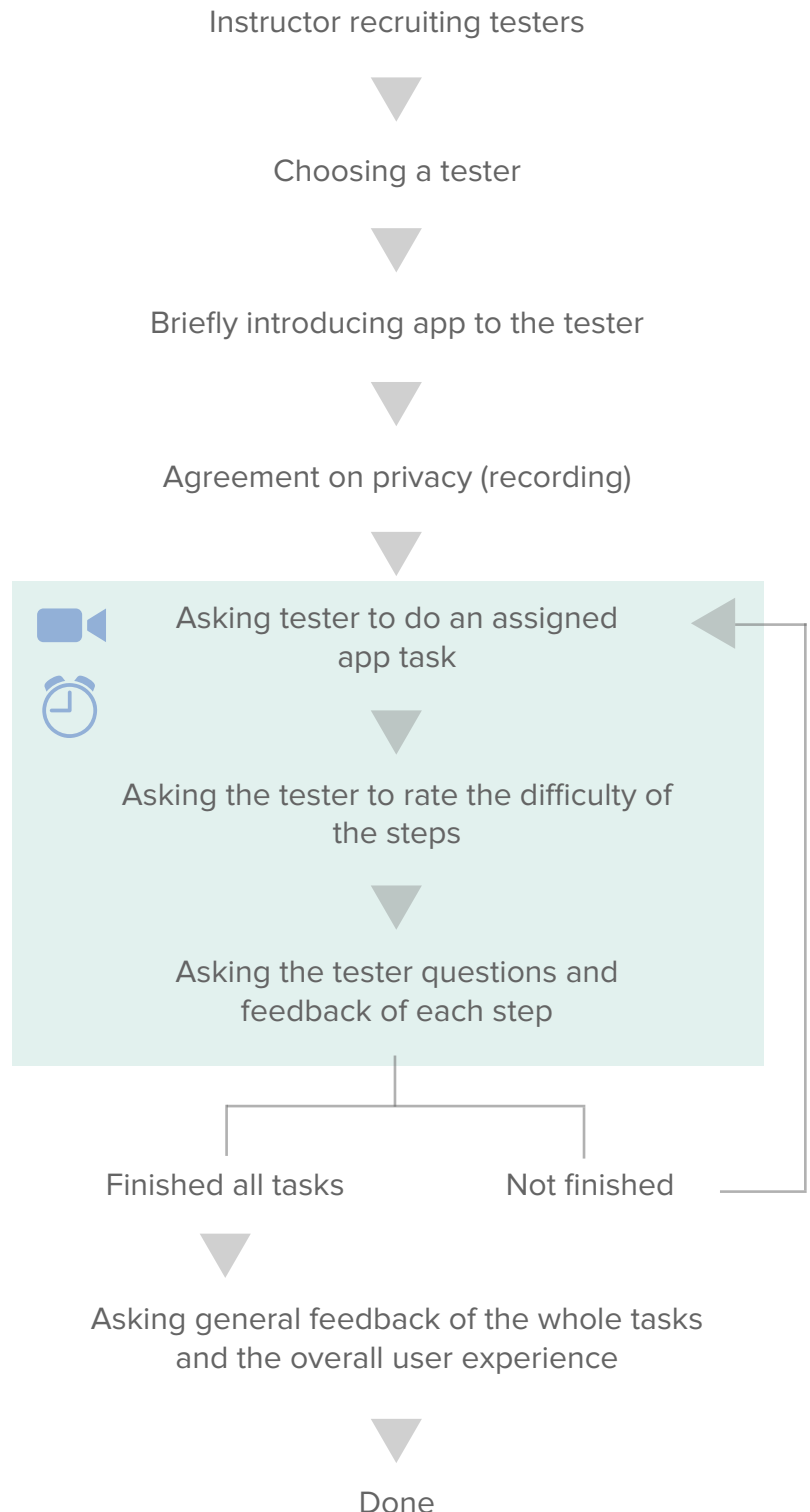

## Executive summary

I conducted the app usability tests at the Sullivant Hall on April 20th and 22nd. The purpose of the test was to assess the usability of the app ACCADIN, focusing on the user experience and finding any possible aspects that needed to be improved.

## Participants

All participants (testers) were recruited by the instructor Jeremy Patterson. Six participants were scheduled over the two testing dates. Three participants were involved in testing on April 20st and three on April 22nd.

## Methodology (demonstrated as an individual)

# Test Content

- |        |   |
|--------|---|
| Task 1 | Explore the Sullivant Hall and take a screen shot of past & now view.                 |
| Task 2 | Find social-network feature and leave a comment on a friend's post.                   |
| Task 3 | Find a journal book, read and share it to your friends.                               |
| Task 4 | Explore the Sullivant Hall, find history of a site and share the history information. |
| Task 5 | View map and find your friend's location.   |

2	5	5	6	6	6
3	6	6	6	6	6
4	6	6	5	6	6
5	6	2	6	5	5
6	6	4	4	6	4
Average score	5.5	4.67	5.5	5.33	5.5

(Chart 4)

# Data & Analysis

## Test result

The overall test shows the most of functions were designed well, user friendly and effective. However, based on the data, task 2 is the most complicated one for user to complete. The possible reason might be the complexity of task content, unclear task description or the user interface. The content and work-flow of task 2 should be reconsidered and improved accordingly. Besides, test result (based on spending time and observation) shows this application can be used fluently by users after a brief introduction.

*“An introduction or tips at the beginning will be better.”*

*“Some titles are fancy but hard to understand.”*

*“How to go back?”*

*“Creating a relationship between two elements.”*

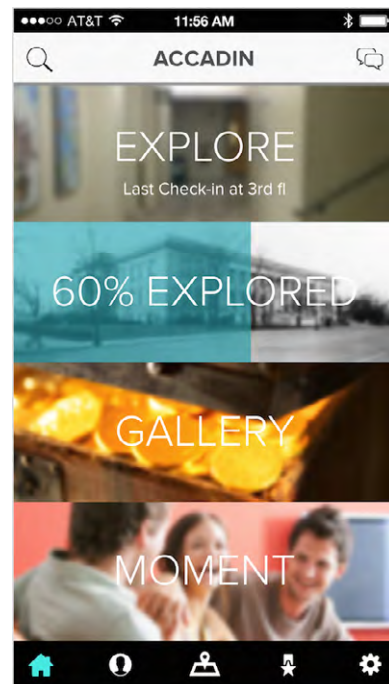

...

# Improvement

## Adding tutorial and quick tips

## Re-titling

# Improvement

## Indication refinement

## Adding classroom service

# Summary

The usability test shows the most of functions were designed well, user friendly and effective. According to the test, majority of participants completed the tests, and the test result (based on spending time and observation) shows this application can be used fluently by users after a brief introduction, which will be included in the release version of the app. And to increase the fluency and enhance the user experience, the app still needs to be improved in the next version.
